

# Calyxra

REVENUE INTELLIGENCE FOR E-COMMERCE

## Your Ads Report Revenue. Your Store Tells a Different Story.

We reconcile what Meta, Google & TikTok report as revenue versus what Shopify actually collects — so you know your true ROAS.

**18–25%**

AVERAGE REVENUE GAP

**\$47K**

AVG. ANNUAL PHANTOM REVENUE

**3.2x → 2.4x**

REPORTED VS TRUE ROAS

# The Revenue Gap Nobody Talks About

Ad platforms report every purchase event as revenue. But Shopify only deposits what's actually collected — after refunds, chargebacks, discounts, and failed payments are subtracted.

## ⚠️ The Result: Inflated ROAS

When you optimize campaigns based on reported ROAS, you're making decisions with **phantom revenue** — money that Meta says you earned but never actually hit your bank account. You could be scaling a campaign that's losing money while thinking it's profitable.

### Revenue Comparison — Typical Shopify Store

■ Meta Reports

\$127,400

↓ -22%

Revenue never collected

● Shopify Actual

\$99,372

## Where Revenue Leaks Come From

### Refunds & Returns

Products returned after purchase still count as revenue in ad platforms

8–12%

### Discount Codes

Meta tracks full-price AOV, ignoring discount codes applied at checkout

5–8%

### Chargebacks & Fraud

Disputed and reversed charges are counted as conversions

3–5%

"We were reporting 4.2x ROAS to our client. After a Calyxra audit, the true number was 2.8x. Two of their 'best' campaigns were actually breakeven."

— DTC Agency, managing \$85K/mo ad spend

# Two Ways to Find Your Revenue Leaks

Try the free scan yourself, or let us run a deep Revenue Leak Audit with expert analysis and recommendations.

### Free Scan — Self-Service

Paste your API keys → instant reconciliation report. Automated, no human touch. You see the gap in 10 seconds.

- Shopify revenue pull (gross, net, refunds, chargebacks, discounts)
- Meta Ads comparison — reported vs actual
- Google / TikTok (optional)
- Phantom revenue number (\$ and %)
- Gap decomposition chart
-    Campaign flagging based on true ROAS
- True ROAS calculation after post-purchase adjustments

### Revenue Leak Audit — Done-For-You

Everything from the free scan + manual deep-dive, expert commentary, and a full action plan. Delivered in 48 hours.

- All automated analysis from the free scan
- Manual deep-dive — patterns + anomalies identified
- Written commentary per campaign
- Gap root cause analysis (e.g. "SUMMER25 causes 40% of the leak")
- Campaign recommendations: PAUSE / SCALE / REDUCE
- Budget reallocation plan with specific amounts
- Projected annual impact ("saves est. \$48K/yr")
- Branded PDF report — share with clients or your team

## Sample: Campaign Reconciliation

| CAMPAIGN                                                                                                 | AD SPEND | REPORTED REV | REP. ROAS | TRUE REV | TRUE ROAS | GAP  | STATUS                                                                                        |
|----------------------------------------------------------------------------------------------------------|----------|--------------|-----------|----------|-----------|------|-----------------------------------------------------------------------------------------------|
|  Summer Sale – TOF    | \$8,200  | \$41,000     | 5.0x      | \$30,750 | 3.8x      | -25% |  Watch   |
|  Retargeting – BOF    | \$4,500  | \$22,500     | 5.0x      | \$20,250 | 4.5x      | -10% |  Healthy |
|  New Collection – TOF | \$6,800  | \$20,400     | 3.0x      | \$12,920 | 1.9x      | -37% |  Leak    |
|  Brand Search         | \$2,100  | \$12,600     | 6.0x      | \$11,340 | 5.4x      | -10% |  Healthy |
|  PMax – All Products  | \$5,400  | \$16,200     | 3.0x      | \$10,530 | 1.9x      | -35% |  Leak    |

The free scan answers: "how big is the gap?" The audit answers: "how big, WHY it exists, and exactly WHAT to do about it."

## Simple Pricing. Three Options.

Try it yourself for free, let us audit it, or subscribe for ongoing monitoring.

### Free Scan

**\$0**

self-service · instant
